24. The method according to claim 8 wherein the pain, swelling, itching or inflammation is caused by a condition selected from one of the following: leprosy; cold sores; colds and flu; sinus congestion; menstrual bloating; menstrual cramps; foot pain; parasitic infections; varicose veins; fibromyalgia; multiple sclerosis; cancer treatments; internal organ injuries; and brain and nerve surgery.—

Copies of specification pages 1 and 12-15 with the changes indicated thereon as well as clean copies of the claims pages 12-15, amended in accordance with the claim amendments described above, are enclosed.

REMARKS:

As the Examiner can see, the claims have been amended as discussed below.

As the Examiner can see, applicant's invention is a lotion and uses thereof wherein the active ingredient is an extract from oatstraw steeped in water.

New claim 23 corresponds to claim 16 of the corresponding PCT application.

Claim 17 has been amended so as to be directed to an additive. Support for this amendment may be found for example on pages 9-11 of the instant application wherein the use of the lotion as an additive in other products is described.

Claims 2, 7 and 21 were rejected under 35 USC 112 for use of the term "magn tized". Specifically, the Examiner has taken the position that the term "magnetized" is "unclear, especially in connection with water".
